**September 8, 2015**

---

To all recipients:

Transmitted herewith is the new Integrated Emergency Operations Plan (EOP) for the City of Tulsa and the unincorporated portions of Tulsa County. This plan supersedes any previous emergency operations plans promulgated by the City or the County for this purpose. The Emergency Operations Plan is designed to be a framework in which the departments of the City of Tulsa and Tulsa County can plan and perform their respective emergency functions during a disaster or national emergency. This plan recognizes other cities within Tulsa County, other than the City of Tulsa, as having their own separate emergency operations plans.

This EOP attempts to be all-inclusive in combining the five missions of emergency management. Those missions are:

- Mitigation- those activities which eliminate or reduce the probability of disaster.
- Prevention- actions taken to avoid an incident or interventions performed that stop an incident from occurring; with a focus on deterrence operations and surveillance systems to stop an incident before it happens.
- Preparedness- those activities that government, organizations, and individuals develop to save lives and minimize damage.
- Response- activities taken during an incident, designed to prevent loss of lives and property and provide emergency assistance.
- Recovery- short and long-term activities which return the community to normal or with improved standards.

In accordance with the Homeland Security Presidential Directive (HSPD) 5, all agencies, departments and organizations having responsibilities delineated in this EOP will use the National Incident Management System (NIMS). This system will allow proper coordination among local, state, and federal organizations.

The Incident Command System (ICS), as a part of NIMS, will enable effective and efficient incident management by integrating a combination of facilities, equipment, personnel, procedures, and communications operating with a common organizational structure. All on-scene management of incidents will be conducted using the Incident Command System.

This plan is written in accordance with existing federal, state, and local statutes. The City of Tulsa, the Tulsa County Board of County Commissioners, the Oklahoma Department of Emergency Management, and the Federal Emergency Management Agency concur with the plan. The plan will be revised and updated as required. All recipients are requested to advise the Director of the Tulsa Area Emergency Management Agency of any changes which might result in its improvement or increase its usefulness.

**City of Tulsa/Tulsa County Emergency Operations Plan  
DISTRIBUTION**

Printed copies of the Emergency Operations Plan will be maintained in the Emergency Operations Center. Departments and Agencies may print and distribute copies of the plan within their organizations as needed.
