Sheriff

Tim Albin
Undersheriff

Wednesday, June 05, 2013

Board of County Commissioners
Karen Keith, Chairman
Tulsa County Administrative Bldg.
Tulsa, OK 74103

Chairman Keith:

The Sheriff's Office requests your consideration and approval of the Justice Reinvestment Initiative application from the Oklahoma Office of the Attorney General on the BOCC agenda for June 10, 2013. The application is for \$135,836.11 in funding.

This grant would allow the Sheriff's Office to hire a gang intelligence analyst to interview gang members incarcerated in David L. Moss and develop violent crime leads and intelligence. The grant would also hire and train a crime analyst to compare violent crime mapping information with reports currently entered in the Sheriff's Office Management System in order to identify "hot spots" for violent crime in Tulsa County.

Sincerely,

Rick Weigel
Chief Deputy

Cc Commissioner Perry
Commissioner Smaligo
Mark Liotta

Original to Pat Key for the June 10, 2013 agenda.

PROGRAM NARRATIVE

NOTE: The Grant Review Committee bases their funding recommendations on the narrative provided in this application. Use additional pages if necessary to describe the need for state funds.

Describe the violent crime rate over the past five years, need for state funds and how the funds will reduce violent crime by using the criteria spelled out in 74 O.S. § 20k.

Please See Attached

Explain how these funds will be used to correct the problem:

Please See Attached

Detail past, current, and future reporting techniques that will be used to demonstrate how the grant funds have reduced violent crime in your jurisdiction:

Please See Attached

Describe the violent crime rate over the past five years, need for state funds, and how the funds will reduce violent crime by using the criteria spelled out in 74 O.S. § 20k.

Attached is the accompanying graph detailing the Tulsa County Sheriff's Office's reported violent crime for the past five years, as determined by UCR statistics. From 2008 to 2012, the Sheriff's Office has responded to 5, 0, 3, 3, and 1 homicides in Tulsa County. While these numbers are relatively low, Tulsa County is committed to replicating the circumstances as seen in 2009, in keeping the undue loss of life at zero. Rapes have proven to be a troubling section of the report, with 16 and 14 occurrences in 2008 and 2009, ballooning disturbingly to 40 and 32 rapes in 2011 and 2012. The number of robberies in Tulsa County has remained relatively stable, with an average of 17 over the past five years. Felonious assaults are the most prevalent form of violent crime in the county: 275 in 2008, 194 in 2009, 263 in 2010, 218 in 2011, and 175 in 2012. While 2012 did have a 20% reduction in felony assaults, this may not prove to be a permanent cut, as was seen in the 29% dip from 2008-2009, but a 35% jump from 2009-2010.

Tulsa County has been on a flat budget for the past four years, with no increases in funding, but obvious increases in costs. As a result, Tulsa County deputies and staff are unable to commit more manpower or resources to trouble spots or reducing violent crime without removing focus from day to day police work. As a result, the office has been unable to address a particularly troubling statistic: in 2012, the number of active gang members in Tulsa County has increased from 2,600 active members to 2,900, with most of the growth in new members of the Aryan Nation and Red Mob gang.

The Tulsa County Sheriff's Office currently administrates and staffs the Tulsa County Jail, the David L. Moss Criminal Justice Center (DLM). On average, 13 known gang members are arrested weekly and booked into DLM. With incarcerated gang members from all areas in Tulsa County, the Sheriff's Office would be remiss if it did not exploit this valuable intelligence source. In response, the Sheriff's Office proposes to hire a full time intelligence analyst whose responsibility would be to perform in-depth interviews with gang members in DLM, with salary and benefits at a cost of \$75,927.83. To support this project, a crime analyst would also be hired to determine hot spots for violent crime and compile statistics and geographic data relevant to the project. The cost for the crime analyst would be \$52,935.28 for salary and benefits and approximately \$7,000 for Alpha Group crime analyst training.

The total cost for this project would be \$135,863.11.

Explain how these funds will be used to correct the problem.

The proposed project would benefit not only the Tulsa County Sheriff's Office's violent crime statistics, but has the potential to have an impact on the violent crime for the entire county and all the municipalities therein. By using the direct approach of interviewing gang members who are incarcerated, the Sheriff's Office will have the ability to develop inside sources of intelligence for crimes that have already been and have yet to be committed. The intelligence analyst will work directly with the crime analyst, criminal investigators and jail investigators to share information and the best available practices to reduce the rate of violent crime and gang activity throughout the county. With the geo mapping information and statistical analysis provided by the crime analyst, patrol deputies will be

committed to aggressively limiting the violent crime capacity of local gangs. In addition, the information will be distributed and readily available to all local agencies and interested law enforcement.

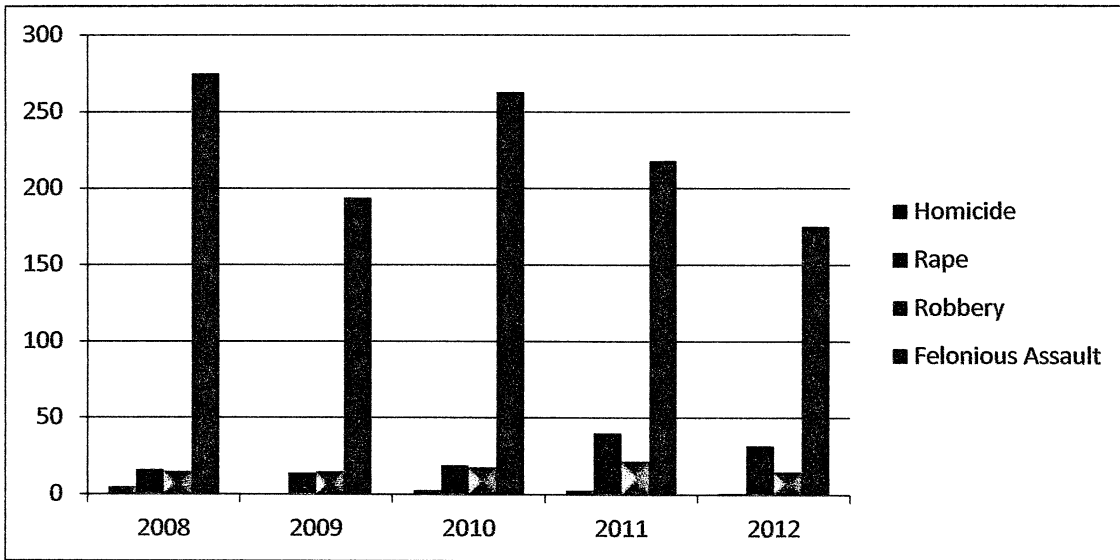

Detail past, current, and future reporting techniques that will be used to demonstrate how the grant funds have reduced violent crime in your jurisdiction.

The current violent crime statistics were amassed by UCR codes as applied by the deputies in their reports, and prepared by criminal investigators. The problem in the current system is that the Sheriff's Office Management System (or SOMS) is not compatible with the mapping software currently available. The duties of the proposed crime analyst will include importing map information into SOMS and report data, to determine the violent and gang related crime rates of the past two years and locate hot spots in Tulsa County. After the approved project period, the crime analyst will work to find statistically significant changes in the crime rate of Tulsa County and the surrounding municipalities to determine if any effect was made, by using SOMS, MapInfo, and reported UCR statistics.
